Daddy Won't Let Mom Drive the Caro Elizabeth Pinto 2019-07-18 "So Sarah?" the teacher asked, in a question I had rehearsed with her, "what's it like to have a blind mom?" "Well," my little girl said, in an unrehearsed answer, "it's like a regular mom, except Daddy won't let her drive his car." With that nonchalant reply in front of her second grade class, Sarah summed up the way my blindness has fit into the fabric of our family. It isn't a problem; it isn't even a novelty; it's just part of how we roll. My blindness has changed a few practical logistics. But in the end, kids are kids and moms are moms, and the dents and delights of parenthood are universal. As I told my daughter when she was very small, putting an only slightly different spin on the words my mom had said to me thirty years before, "The eyes in my face are broken, but the ones in the back of my head work just fine." "Daddy Won't Let Mom Drive the Car: True Tales of Parenting in the Dark" is a book of short vignettes--most of them lighthearted, a few more serious--about my life as the blind mother of a sighted daughter. Welcome to my journey!

Trading Bases Joe Peta 2013-03-07 An ex-Wall Street trader improved on Moneyball's famed sabermetrics and beat the Vegas odds with his own betting methods. Here is the story of how Joe Peta turned fantasy baseball into a dream come true. Joe Peta turned his back on his Wall Street trading career to pursue an ingenious--and incredibly risky--dream. He would apply his risk-analysis skills to Major League Baseball, and treat the sport like the S&P 500. In Trading Bases, Peta takes us on his journey from the ballpark in San Francisco to the trading floors and baseball bars of New York and the sportsbooks of Las Vegas, telling the story of how he created a baseball "hedge fund" with an astounding 41 percent return in his first year. And he explains the unique methods he developed. Along the way, Peta provides insight into the Wall Street crisis he managed to escape: the fragility of the midnineties investment model; the disgraced former CEO of Lehman Brothers, who recruited Peta; and the high-adrenaline atmosphere where million-dollar sports-betting pools were common.

The Diaper-Free Baby Christine Gross-Loh 2009-10-13 Imagine infants free from painful diaper rash, new parenthood without thousands of dollars wasted in diapering costs, toilet training that is natural and noncoercive, and, most important, happier babies and parents As Christine Gross-Loh reveals in her progressive, enlightening book, all this is possible and more. Infants are born with the ability to communicate their need to "go," just as they communicate hunger or sleepiness. Gross-Loh, a mother of two children who were diaper-free at eighteen and fifteen months, uses the tenets of "elimination communication," or EC, to teach parents how to identify and respond to their baby or toddler's natural cues. Unlike the all-or-nothing approach of some parenting books, The Diaper-Free Baby addresses three categories of parents: full-time, part-time, and occasional EC'ers. Parents can practice EC as much or as little as fits their family and lifestyle. A support group within a book, The Diaper-Free Baby also includes inspiring testimonials throughout every chapter. Parents who have successfully practiced EC identify common struggles, share experiences and problem-solving tips, and provide encouragement for those new to the technique. Their motivational stories together with Gross-Loh's practical advice will appeal to all parents interested in a fresh alternative to traditional toilet training.

Sex, Love, and Migration Alexia Bloch 2017-12-15 Sex, Love, and Migration goes beyond a common narrative of women's exploitation as a feature of migration in the early twenty-first century, a story that features young women from poor countries who cross borders to work in low paid and often intimate labor. Alexia Bloch argues that the mobility of women is marked not only by risks but also by personal and social transformation as migration fundamentally reshapes women's emotional worlds and aspirations. Bloch documents how, as women have crossed borders between the former Soviet Union and Turkey since the early 1990s, they have forged new forms of intimacy in their households in Moldova, Ukraine, Belarus, and Russia, but also in Istanbul, where they often work for years on end. Sex, Love, and Migration takes as its subject the lives of post-Soviet migrant women employed in three distinct spheres—sex work, the garment trade, and domestic work. Bloch challenges us to decouple images of women on the move from simple assumptions about danger, victimization, and trafficking. She redirects our attention to the aspirations and lives of women who, despite myriad impediments, move between global capitalist centers and their home communities.

Automating Inequality Virginia Eubanks 2018-01-23 WINNER: The 2018 McGannon Center Book Prize and shortlisted for the Goddard Riverside Stephan Russo Book Prize for Social Justice The New York Times Book Review: "Riveting." Naomi Klein: "This book is downright scary." Ethan Zuckerman, MIT: "Should be required reading." Dorothy Roberts, author of Killing the Black Body: "A must-read." Astra Taylor, author of The People's Platform: "The single most important book about technology you will read this year." Cory Doctorow: "Indispensable." A powerful investigative look at data-based discrimination—and how technology affects civil and human rights and economic equity The State of Indiana denies one million applications for healthcare, foodstamps and cash benefits in three years—because a new computer system interprets any mistake as "failure to cooperate." In Los Angeles, an algorithm calculates the comparative vulnerability of tens of thousands of homeless people in order to prioritize them for an inadequate pool of housing resources. In Pittsburgh, a child welfare agency uses a statistical model to try to predict which children might be future victims of abuse or neglect. Since the dawn of the digital age, decision-making in finance, employment, politics, health and human services has undergone revolutionary change. Today, automated systems—rather than humans—control which neighborhoods get policed, which families attain needed resources, and who is investigated for fraud. While we all live under this new regime of data, the most invasive and punitive systems are aimed at the poor. In Automating Inequality, Virginia Eubanks systematically investigates the impacts of data mining, policy algorithms, and predictive risk models on poor and working-class people in America. The book is full of heart-wrenching and eye-opening stories, from a woman in Indiana whose benefits are literally cut off as she lays dying to a family in Pennsylvania in daily fear of losing their daughter because they fit a certain statistical profile. The U.S. has always used its most cutting-edge science and technology to contain, investigate, discipline and punish the destitute. Like the county poorhouse and scientific charity before them, digital tracking and automated decision-making hide poverty from the middle-class public and give the nation the ethical distance it needs to make inhumane choices: which families get food and which starve, who has housing and who remains homeless, and which families are broken up by the state. In the process, they weaken democracy and betray our most cherished national values. This deeply researched and passionate book could not be more timely.

The Happiest Baby on the Block Harvey Karp, M.D. 2008-11-19 Perfect for expecting parents who want to provide a soothing home for the newest member of their family, The Happiest Baby on the Block, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals an extraordinary treasure sought by parents for centuries --an automatic "off-switch" for their baby's crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has found there IS a remedy for colic. "I share with parents techniques known only to the most gifted baby soothers throughout history ...and I explain exactly how they work." In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp

blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses: ·The Missing Fourth Trimester: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon. ·The Calming Reflex: the automatic reset switch to stop crying of any baby in the first few months of life. ·The 5 "S's": the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to serenity in minutes...and help them sleep longer too. ·The Cuddle Cure: the perfect mix the 5 "S's" that can soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point by their infant's persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the tools they need to be able to calm their babies almost as easily as...turning off a light. From the Hardcover edition.
