Radio Gals Mike Craver 1997 Set in the late 1920's, and concerning an enterprising woman, Hazel Hunt, of Cedar Ridge, Arkansas who, upon her retirement as the town music teacher, receives a Western Electric 500 watt radio transmitter and begins broadcasting as radio station "WGAL". What comes out over the local airwaves is a small town diary, calendar, and stream of consciousness -- sort of a Molly Bloom crossed with the Farmers' Almanac -- with generous dollops of singing and playing by Hazel's "all-girl" orchestra, "the Hazelnuts", and that lovesick flapper Gladys Fritts. However, due to Hazel's habit of "channel wandering", her broadcasts are not always so local. And listeners as far away as Montreal and Manhattan can testify. Enter O.B. Abbott, Federal Radio Inspector, intent on rescuing the airwaves from gypsies like Hazel Hunt. However, Mr. Abbott soon falls prey to the blandishments of the Hazelnuts, and the Shangri-La that is Cedar Ridge. Inspector Abbott, it turns out, also has a fine tenor voice, plays a mean accordion, and in the course of things falls for the flapper.

Affective Health and Masculinities in South Africa Hans Reihling 2020-04-24 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

The Rejection of Consequentialism Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The Culture of Time and Space 1880-1918 Stephen Kern 1983-01-01 THIS EDITION HAS BEEN REPLACED BY A NEWER EDITION From about 1880 to World War I, sweeping changes in technology and culture created new modes of understanding and experiencing time and space. Stephen Kern writes about the onrush of technics that reshaped life concretely--telephone, electric lighting, steamship, skyscraper, bicycle, cinema, x-ray, machine gun-and the cultural innovations that shattered older forms of art and thought--the stream-of-consciousness novel, psychoanalysis, Cubism, simultaneous poetry, relativity, and the introduction of world standard time. Kern interprets this generation's revolutionized sense of past, present, and future, and of form, distance, and direction. This overview includes such figures as Proust Joyce, Mann, Wells, Gertrude Stein, Strindberg, Freud, Husserl, Apollinaire, Conrad, Picasso, and Einstein, as well as diverse sources of popular culture drawn from journals, newspapers, and magazines. It also treats new developments in personal and social relations including scientific management, assembly lines, urbanism, imperialism, and trench warfare. While exploring transformed spatial-temporal dimensions, the book focuses on the way new sensibilities subverted traditional values. Kern identifies a broad leveling of cultural hierarchies such as the Cubist breakdown of the conventional distinction between the prominent subject and the framing background, and he argues that these levelings parallel the challenge to aristocratic society, the rise of democracy, and the death of God. This entire reworking of time and space is shown finally to have influenced the conduct of diplomacy during the crisis of July 1914 and to havestructured the Cubist war that followed.

Moon-Face & Other Stories Jack London 2017-08-08 MOON-FACE (Excerpt) John Claverhouse was a moon-faced man. You know the kind, cheek-bones wide apart, chin and forehead melting into the cheeks to complete the perfect round, and the nose, broad and pudgy, equidistant from the circumference, flattened against the very centre of the face like a dough-ball upon the ceiling. Perhaps that is why I hated him, for truly he had become an offense to my eyes, and I believed the earth to be cumbered with his presence. Perhaps my mother may have been superstitious of the moon and looked upon it over the wrong shoulder at the wrong time. Be that as it may, I hated John Claverhouse. Not that he had done me what society would consider a wrong or an ill turn. Far from it. The evil was of a deeper, subtler sort; so elusive, so intangible, as to defy clear, definite analysis in words. We all experience such things at some period in our lives. For the first time we see a certain individual, one who the very instant before we did not dream existed; and yet...

American Jihadist Terrorism: Combating a Complex Threat 2011 From May 2009 through October 2011, arrests were made for 32 "homegrown," jihadist-inspired terrorist plots by American citizens or legal permanent residents of the United States. Two of these resulted in attacks--U.S. Army Major Nidal Hasan's alleged assault at Fort Hood in Texas and Abdulhakim Muhammed's shooting at the U.S. Army-Navy Career Center in Little Rock, AR--and produced 14 deaths. By comparison, in more than seven years from the September 11, 2001, terrorist strikes (9/11) through April 2009, there were 21 such plots. Two resulted in attacks, and no more than six plots occurred in a single year (2006). The apparent spike in such activity from May 2009 to October 2011 suggests that at least some Americans--even if a tiny minority--continue to be susceptible to ideologies supporting a violent form of jihad. This report describes homegrown violent jihadists and the plots and attacks that have occurred since 9/11. For this report, "homegrown" and "domestic" are terms that describe terrorist activity or plots perpetrated within the United States or abroad by American citizens, legal permanent residents, or visitors radicalized largely within the United States. The term "jihadist" describes radicalized individuals using Islam as an ideological and/or religious justification for their belief in the establishment of a global caliphate, or jurisdiction governed by a Muslim civil and religious leader known as a caliph. The term "violent jihadist" characterizes jihadists who have made the jump to illegally supporting, plotting, or directly engaging in violent terrorist activity. The report also discusses the radicalization process and the forces driving violent extremist activity. It analyzes post-9/11 domestic jihadist terrorism and describes law enforcement and intelligence efforts to combat terrorism and the challenges associated with those efforts. It also outlines actions underway to build trust and partnership between community groups and government agencies and the tensions that may occur between law enforcement and engagement activities. Appendix A provides details about each of the post-9/11 homegrown jihadist terrorist plots and attacks. Finally, the report offers policy considerations for Congress.
