An African Language Experience Dahiru Muhammad Argungu 2017-09-21 The present book is about Hausa linguacultural practices. Its primary goal is to demonstrate aspects of the relationship between Hausa language and culture as it affects northern Nigeria, the territory with the largest concentration of native-Hausa speakers on earth today. Using various examples, illustrations and real-life situations, the book seeks to portray Hausa speakers experiences and practices as they daily exploit their language to communicate their needs and, in the process, express their culture. These experiences and practices are realised largely through Hausa verbal and non-verbal means or both which together give rise to linguacultural patterns of behaviour unique to the speakers. It is hoped that readers, particularly non-Hausas, will find the book enjoyable especially in trying to experience what native-Hausa speakers, using their language to communicate, experience during social interactions. Supported by a number of optional activities and exercises, students and teachers of Hausa will particularly find the book not only resourceful and entertaining but also reader-friendly especially with regard to the role of culture in language learning and teaching. Indeed the book has been partly written to encourage the use of Hausa culture in language teaching and learning.

Practising Strategy Tersia Botha 2019-01-25 "Given the common acknowledgment that strategy implementation is the greatest challenge to managers in the 21st century and the greatest reason for strategy failure we decided to focus on strategy implementation. Rather than promoting the unrealistic idea of strategy as a purely rational and deliberate outcome, this book acknowledges and explores the idea that strategy is often emergent, messy and experimental and features a number of new chapters, focusing on strategy implementation and change management, resource allocation and responsible leadership. It also includes a more detailed coverage of managing strategic risk."—Publisher's description.

Advanced Calculus Lynn Harold Loomis 2014-02-26 An authorised reissue of the long out of print classic textbook, *Advanced Calculus* by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention *Differential and Integral Calculus* by T Apostol, *Calculus* by T Apostol, *Calculus* by M Spivak, and *Pure Mathematics* by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of

normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

Small Things Nthikeng Mohlele 2018-05 In this haunting tale of love and learning, the existential chaos of a life ravaged by circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, "where suffering has no meaning", where an individual escapes death only to find himself confronted with choices wrought by remorse and retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...

The first part covers European law with a focus on the institutions of the European Union, the four freedoms and competition law. The second part focuses on individual international contracts. This part starts with the legal environment of the business transaction. The political and policy risks of doing business abroad are explained, as well as how they should be addressed. It continues with entry strategies in foreign markets and then goes on to focus on the individual contract of sale. A wide range of subjects are covered, including general conditions of sale, retention of title, the CISG, product safety and product liability, Incoterms, contract of carriage, jurisdiction, choice of law and arbitration, standard contract clauses and payment conditions. This book takes a practical approach and contains examples and exercises. However, it does try to explain the main pitfalls of doing business in foreign countries and how to avoid them.
