**The Procrastination Economy** Ethan Tussey 2020-04-01 2018 Outstanding Academic Title, given by Choice Magazine How mobile devices make our in-between moments valuable to media companies while also providing a sense of control and connection In moments of downtime - waiting for a friend to arrive or commuting to work - we pull out our phones for a few minutes of distraction. Just as television reoriented the way we think about living rooms, mobile devices have taken over the interstitial spaces of our everyday lives. Ethan Tussey argues that these in-between moments have created a procrastination economy, an opportunity for entertainment companies to create products, apps, platforms, subscription services, micropayments, and interactive opportunities that can colonize our everyday lives. But as businesses commoditize our free time, and mobile devices become essential tools for promotion, branding and distribution, consumers are using these devices as a means of navigating public and private space. These devices are not just changing the way we spend and value our time, but also how we interact with others and transform our sense of the politics of space. By examining the four main locations of the procrastination economy—the workplace, the commute, the waiting room, and the “connected” living room—Ethan Tussey illuminates the relationship between the entertainment industry and the digitally empowered public.

**Futurama: Looking Backward at Present Day America** Christian Schlegel 2014-06-27 Matt Groening developed together with his friend and colleague David X. Cohen the TV-Show Futurama, set in New York in the year 3000. Groening describes his 'vision of the future' in Futurama as corporate, commercial and confusing which is not what he expects it to be, and it is not necessarily valuing this world as good or bad. Thus, the assumption of this study is that Futurama presents a stereotyped science fiction-world that deals with themes and problems of our present time. This becomes clear when looking at the excessive use of allusions and references to political and historical events as well as to popular and classical culture. The creators comment that way on topics that concern us - or at least should concern us - today. The task of this study is to identify these topics and references (focusing on America as a political entity), and thereby discuss the points of criticism Futurama raises.

**Imaging the City** Jr. Warner 2021-12-17 Planners face a controversial task because their professional role requires them to be spokespersons for the public interest. In a welter of conflicting pictures and voices, how might the public interest be discovered? Once identified, how might it be expressed so that competing publics attend to it? There are no easy answers, but the experience of planners today suggests ways of working and innovations of promise. The focus on planning practice prompted the editors to analyze images that are now at work in our cities. For Vale and Warner, all city design and constructions offer material that people should include in images of their environment. The built and building city are part of the experience of all city dwellers; it is theirs to incorporate, interpret, or ignore. Essays included in this text trace the interplay between physical objects of planners and architects and the social experience and outlooks of image makers and their audiences. Imaging the City explores urban image making from civic boosterism of medieval cities to iconic imagery of Times Square. Vale and Warner bring together urban historians, geographers, city planners, architects, and cultural commentators to analyze the creation of urban imagery from the signature skyscrapers of Kuala Lumpur to the re-creation of the South Bronx and the use of city images in film, literature, television, and on the Internet. Urban dwellers, urban planners, architects, municipal officials, sociologists, urban historians - all will perceive their worlds with a heightened sense of awareness after reading this book.
