The Watch Joydeep Roy-Bhattacharya 2012-06-05 In this powerful novel set in contemporary Kandahar, an Afghan woman approaches an American military base to demand the return of her brother's body. At a stark outpost in the Kandahar mountain range, a team of American soldiers watches a young Afghan woman approach. She has come to beg for the return of her brother's body. The camp's tense, claustrophobic atmosphere comes to a boil as the men argue about what to do next. Taking its cue from the Antigone myth, this significant, eloquent novel re-creates the chaos, intensity, and immediacy of war, and conveys the inevitable repercussions felt by the soldiers and their families--especially one sister.

**The Power of Moments** Chip Heath 2017-10-03 The New York Times bestselling authors of Switch and Made to Stick explore why certain brief experiences can jolt us and elevate us and change us--and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why "we feel most comfortable when things are certain, but we feel most alive when they're not." And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world's youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck--but why would we leave our most meaningful, memorable moments to chance when we can create them? The Power of Moments shows us how to be the author of richer experiences.

The Book of Stolen Tales D J McIntosh 2013-05-28 In 2011, D.J. McIntosh took the book world by storm with her debut novel, The Witch of Babylon. Praised for its "stellar research" and "superb writing", it introduced readers to John Madison, a rakish New York art dealer with a past, who uncovered a fabulous treasure trove of antiquities in the hills outside of Baghdad and the truth behind a famous story long believed to be a myth. In the highly anticipated sequel, New York art dealer John Madison travels to London to purchase at auction a rare seventeenth-century Italian book of fairy tales for an anonymous client. Before he can deliver it to the buyer, he is robbed by a mysterious man claiming to be the book's author. When his client disappears and the book's provenance is questioned, Madison realizes that the only way to find the buyer, recover the lost book, and save his reputation is to immerse himself in the world of European aristocracy and bibliophilic obsession. Along the way, he discovers that a well-loved children's tale contains a necromancer's spell and the truth about an ancient Mesopotamian plague.

**The Tyranny of Metrics** Jerry Z. Muller 2019-04-30 How the obsession with quantifying human performance threatens business, medicine, education, government--and the quality of our lives Today, organizations of all kinds are ruled by the belief that the path to success is quantifying human performance, publicizing the results, and dividing up the rewards based on

the numbers. But in our zeal to instill the evaluation process with scientific rigor, we've gone from measuring performance to fixating on measuring itself—and this tyranny of metrics now threatens the quality of our organizations and lives. In this brief, accessible, and powerful book, Jerry Muller uncovers the damage metrics are causing and shows how we can begin to fix the problem. Filled with examples from business, medicine, education, government, and other fields, the book explains why paying for measured performance doesn't work, why surgical scorecards may increase deaths, and much more. But Muller also shows that, when used as a complement to judgment based on personal experience, metrics can be beneficial, and he includes an invaluable checklist of when and how to use them. The result is an essential corrective to a harmful trend that increasingly affects us all.

**Gardens of the Moon** Steven Erikson 2004-06-01 Vast legions of gods, mages, humans, dragons and all manner of creatures play out the fate of the Malazan Empire in this first book in a major epic fantasy series. The Malazan Empire simmers with discontent, bled dry by interminable warfare, bitter infighting and bloody confrontations with the formidable Anomander Rake and his Tiste Andii, ancient and implacable sorcerers. Even the imperial legions, long inured to the bloodshed, yearn for some respite. Yet Empress Laseen's rule remains absolute, enforced by her dread Claw assassins. For Sergeant Whiskeyjack and his squad of Bridgeburners, and for Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. But Darujhistan, last of the Free Cities of Genabackis, yet holds out. It is to this ancient citadel that Laseen turns her predatory gaze. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... Conceived and written on a panoramic scale, *Gardens of the Moon* is epic fantasy of the highest order—an enthralling adventure by an outstanding new voice. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**An Anglo-Norman Reader** Jane Bliss 2018-02-08 This book is an anthology with a difference. It presents a distinctive variety of Anglo-Norman works, beginning in the twelfth century and ending in the nineteenth, covering a broad range of genres and writers, introduced in a lively and thought-provoking way. Facing-page translations, into accessible and engaging modern English, are provided throughout, bringing these texts to life for a contemporary audience. The collection offers a selection of fascinating passages, and whole texts, many of

which are not anthologised or translated anywhere else. It explores little-known byways of Arthurian legend and stories of real-life crime and punishment; women's voices tell history, write letters, berate pagans; advice is offered on how to win friends and influence people, how to cure people's ailments and how to keep clear of the law; and stories from the Bible are retold with commentary, together with guidance on prayer and confession. Each text is introduced and elucidated with notes and full references, and the material is divided into three main sections: Story (a variety of narrative forms), Miscellany (including letters, law and medicine, and other non-fiction), and Religious (saints' lives, sermons, Bible commentary, and prayers). Passages in one genre have been chosen so as to reflect themes or stories that appear in another, so that the book can be enjoyed as a collection or used as a resource to dip into for selected texts. This anthology is essential reading for students and scholars of Anglo-Norman and medieval literature and culture. Wide-ranging and fully referenced, it can be used as a springboard for further study or relished in its own right by readers interested to discover Anglo-Norman literature that was written to amuse, instruct, entertain, or admonish medieval audiences.

**A Century of Subways** Brian J. Cudahy 2009-08-25 The transit historian and author of *Under the Sidewalks of New York* delivers a lively and authoritative history of New York City's fabled subway. On the afternoon of October 27, 1904, ordinary New Yorkers descended beneath the sidewalks for the first time to ride the electric-powered trains of the newly inaugurated Interborough Rapid Transit System. More than a century later, the subway has expanded greatly, weaving its way into the fabric of New York's unique and diverse urban life. In *A Century of Subways*, transit historian Brian J. Cudahy offers a fascinating tribute to New York's storied and historic subway system, from its earliest beginnings and many architectural achievements, to the ways it helped shape today's modern metropolis. Taking a fresh look at one of the marvels of the twentieth century, Cudahy creates a vivid sense of this extraordinary system and the myriad ways the city was transformed once New Yorkers started riding below the ground.

Intelligent Projects Using Python Santanu Pattanayak 2019-01-31 Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network

architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn

Build an intelligent machine translation system using seq-2-seq neural translation machines  
Create AI applications using GAN and deploy smart mobile apps using TensorFlow  
Translate videos into text using CNN and RNN  
Implement smart AI Chatbots, and integrate and extend them in several domains  
Create smart reinforcement, learning-based applications using Q-Learning  
Break and generate CAPTCHA using Deep Learning and Adversarial Learning

Who this book is for  
This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

**The Magic of Gingerbread** Catherine Beddall 2016-08 There's something magical about gingerbread. What is it about gingerbread houses that bring a smile to our face? For children, it's not hard to imagine, that the smiles most likely come from the joyful anticipation of eating all of that colorful candy! As adults, perhaps seeing these festive houses takes us back to our youth a time when we were carefree, and visions of sugarplums danced in our heads. Catherine Beddall has mastered the art of gingerbread and now shares her techniques and tips in *The Magic of Gingerbread* to help you create your very own gingerbread masterpieces! Intimidated? Don't be! Anyone can bake and decorate a gingerbread house, she says. I know it might seem easier to buy one of the prefabricated boxed gingerbread house kits you can find at the grocery store, but if you're willing to invest a little bit of time and patience, the results of your handcrafted gingerbread creation will be so much more satisfying and actually taste like a sweet, spicy cookie and not a chunk of dusty cardboard. Catherine guides you through the baking and decorating process with step-by-step visual instructions for 16 delicious projects from classic candy houses (with a multitude of beautiful variations including a birdhouse and a haunted house), to a space rocket, robot, and chess set! Step inside the world of gingerbread and let your creativity flourish into festive expressions!

**The Dispensable Nation** Vali Nasr 2013-04-10 Former State Department adviser for Afghanistan and Pakistan Vali Nasr delivers a sharp indictment of America's flawed foreign policy, and outlines a new relationship with the Muslim world and with new players in the changing Middle East. In this essential new book, Vali Nasr argues that the Obama administration had a chance to improve its relations with the Middle East, but instead chose to pursue its predecessor's questionable strategies there. Nasr takes readers behind the scenes at the State Department and reveals how the new government's fear of political backlash and the spectre of terrorism crippled the efforts of diplomatic giants, like Richard Holbrooke and Hillary Clinton, to boost America's foundering credibility with world leaders. Meanwhile, the true economic threats, China and Russia, were quietly expanding their influence in the region. And a second Arab Spring is brewing – not a hopeful clamour for democracy, but rage at the United States for its foreign policy of drones and assassinations. Drawing on his in-depth knowledge of the Middle East and firsthand experience in diplomacy, Nasr offers a powerful reassessment of American foreign policy that directs the country away from its failing relationships in the Middle East (such as with Saudi Arabia) toward more productive, and less costly, partnerships with other foreign allies (such as Turkey). Forcefully persuasive, *The Dispensable Nation* is a game changer for America as it charts a course in the Muslim world, Asia, and beyond.

**And the Birds Rained Down** Jocelyne Saucier 2013-03-22 A CBC CANADA READS 2015 SELECTION! FINALIST FOR THE 2013 GOVERNOR GENERAL'S LITERARY AWARD FOR FRENCH-TO-ENGLISH TRANSLATION Tom and Charlie have decided to live out the remainder of their lives on their own terms, hidden away in a remote forest, their only connection to the outside world a couple of pot growers who deliver whatever they can't eke out for themselves. But one summer two women arrive. One is a young photographer documenting a series of catastrophic forest fires that swept Northern Ontario early in the century; she's on the trail of the recently deceased Ted Boychuck, a survivor of the blaze. And then the elderly aunt of the one of the pot growers appears, fleeing one of the psychiatric institutions that have been her home since she was sixteen. She joins the men in the woods and begins a new life as Marie-Desneige. With the photographer's help, they find Ted's series of paintings about the fire, and begin to decipher the dead man's history. A haunting meditation on aging and self-determination, *And the Birds Rained Down*, originally published in French as *Il pleuvait des oiseaux*, was the winner of the Prix des Cinq Continents de la Francophonie, the first Canadian title to win this honour. It was winner of the Prix des lecteurs Radio-Canada, the Prix des collégiens du Québec, the Prix Ringuet 2012 and a finalist for the Grand Prix de la ville de Montréal. 'Nostalgic and beautifully grotesque, this novel is delightfully baroque and, although short, so striking it will simply never leave you.' - The Coast Jocelyne Saucier's novels have received countless prizes, including the Prix des Cinq Continents de la Francophonie. Rhonda Mullins's translation of Saucier's novel *Jeanne's Road* was nominated for the Governor General's Award.

*The Uninvited Guest* John Degen 2015-07-15 Some people win games. Some achieve success. But when it comes right down to it, most people don't. Failure is a guest no one invites, yet it shows up almost everywhere. The gifts it brings are easy to overlook. *The Uninvited Guest* is a whirlwind ride featuring Romanian hockey superstars growing up in Montreal, Danish prostitutes working in Sweden, Russian mobsters, the perils of parking in Penitanguishene, and how not to die if you want to make it home on time. Most of all, it's the story of Stan Cooper, hockey timekeeper/custodian-turned-trophy-keeper; Tony, a young Italian Canadian man and new Cup keeper; and Dragos Petrescu, the first Romanian-born hockey player to win the Stanley Cup. Over a period of 50 years, the lives of the three men weave in and out of each other, with themes of love, hate, family, jealousy and ultimately, forgiveness.

**The Noma Guide to Fermentation** René Redzepi 2018-10-16 New York Times Bestseller A New York Times Best Cookbook of Fall 2018? "An indispensable manual for home cooks and pro chefs." -Wired At Noma-four times named the world's best restaurant-every dish includes some form of fermentation, whether it's a bright hit of vinegar, a deeply savory miso, an electrifying drop of garum, or the sweet intensity of black garlic. Fermentation is one of the foundations behind Noma's extraordinary flavor profiles. Now René Redzepi, chef and co-owner of Noma, and David Zilber, the chef who runs the restaurant's acclaimed fermentation lab, share never-before-revealed techniques to creating Noma's extensive pantry of ferments. And they do so with a book conceived specifically to share their knowledge and techniques with home cooks. With more than 500 step-by-step photographs and illustrations, and with every recipe approachably written and meticulously tested, *The Noma Guide to Fermentation* takes readers far beyond the typical kimchi and sauerkraut to include koji, kombuchas, shoyus, misos, lacto-ferments, vinegars, garums, and black fruits and vegetables. And-perhaps even more important-it shows how to use these game-changing pantry ingredients in more than 100 original recipes. Fermentation is already building as the most significant new direction in food (and health). With *The Noma Guide to Fermentation*, it's about to be taken to a whole new level.

Dozen and The Great Escape, with a sprinkling of Ocean's 11 thrown in for good measure."—Michiko Kakutani, The New York Times ONE OF NPR'S BEST BOOKS OF THE YEAR • "Rogue Heroes is a ripping good read."—Washington Post (10 Best Books of the Year) Britain's Special Air Service—or SAS—was the brainchild of David Stirling, a young aristocrat whose aimlessness belied a remarkable strategic mind. Where most of his colleagues looked at a World War II battlefield map and saw a protracted struggle, Stirling saw an opportunity: given a small number of elite men, he could parachute behind Nazi lines and sabotage their airplanes and supplies. Defying his superiors' conventional wisdom, Stirling assembled a revolutionary fighting force that would upend not just the balance of the war, but the nature of combat itself. Bringing his keen eye for detail to a riveting wartime narrative, Ben Macintyre uses his unprecedented access to the SAS archives to shine a light on a legendary unit long shrouded in secrecy.

**Start Simple** Lukas Volger 2020-02-18 From veteran food writer, recipe developer, and creator of the James Beard Award-winning Jarry magazine comes an innovative approach to vegetarian cooking. What have I got to eat? It's a question we ask every time we open up the refrigerator or pantry door. It might be eggs, some cheese, and half a loaf of bread, or a box of wilting greens, garlic, and some sweet potatoes. Though these ingredients may not seem like much to make a delicious meal, recipe developer and author Lukas Volger knows it's all you need. In Start Simple he offers a radically new, uncomplicated, and creative approach to cooking that allows you to use what you already have on hand to make great meals you didn't think were possible. Magic can happen with just a few ingredients: sweet potatoes, tortillas, eggs, cabbage, hearty greens, beans, winter squash, mushrooms, tofu, summer squash, and cauliflower. Volger advises readers to stock up on these eleven building blocks instead of shopping for a single recipe. A protein (tofu, beans, eggs) is a foundation. A crunchy garnish (cabbage, greens) is a finishing touch. Once these structural components of a meal are established, home chefs can throw in their own variations and favorite flavors—mixing, matching, and adding ingredients to customize their dishes. While Start Simple is a vegetarian cookbook—none of the recipes include meat—Volger's approach transcends categories. His methods aren't about subscribing to a specific dietary regimen; they are about simply recognizing and embracing the way people cook and eat today. Creating weekly meal plans based on intricate recipes sounds good, but it can be difficult to execute. Having a well-stocked pantry paired with a choose-you-own adventure guide to creating simple yet inventive meals is more practical for your average home cook.

**Straphanger** Taras Grescoe 2012-04-24 Taras Grescoe rides the rails all over the world and makes an elegant and impassioned case for the imminent end of car culture and the coming transportation revolution "I am proud to call myself a straphanger," writes Taras Grescoe. The perception of public transportation in America is often unflattering—a squalid last resort for those with one too many drunk-driving charges, too poor to afford insurance, or too decrepit to get behind the wheel of a car. Indeed, a century of auto-centric culture and city planning has left most of the country with public transportation that is underfunded, ill maintained, and ill conceived. But as the demand for petroleum is fast outpacing the world's supply, a revolution in transportation is under way. Grescoe explores the ascendance of the straphangers—the growing number of people who rely on public transportation to go about the business of their daily lives. On a journey that takes him around the world—from New York to Moscow, Paris, Copenhagen, Tokyo, Bogotá, Phoenix, Portland, Vancouver, and Philadelphia—Grescoe profiles public transportation here and abroad, highlighting the people and ideas that may help undo the damage that car-centric planning has done to our cities and create convenient, affordable, and sustainable urban transportation—and better city living—for all.
