Controlling Capital Nicholas Dorn 2016-02-12 Controlling Capital examines three pressing issues in financial market regulation: the contested status of public regulation, the emergence of 'culture' as a proposed modality of market governance, and the renewed ascendancy of private regulation. In the years immediately following the outbreak of crisis in financial markets, public regulation seemed almost to be attaining a position of command – the robustness and durability of which is explored here in respect of market conduct, European Union capital markets union, and US and EU competition policies. Subsequently there has been a softening of command and a return to public-private co-regulation, positioned within a narrative on culture. The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational aspects, stakeholder connivance and wider political embeddedness. Lastly the book looks from both appreciative and critical perspectives at private regulation, through financial market associations, arbitration of disputes and, most controversially, market 'policing' by hedge funds. Bringing together a distinguished group of international experts, this book will be a key text for all those concerned with issues arising at the intersection of financial markets, law, culture and governance.

Cities in Crisis Jörg Knieling 2015-09-16 In recent years, European societies and territories have witnessed the spatial impacts of a severe financial and socio-economic crisis. This book builds on the current debate concerning how cities and urban regions and their citizens deal with the consequences of the recent financial and socio-economic crisis. Cities in Crisis examines the political and administrative implications of austerity measures applied in southern European cities. These include cuts in local public spending and the processes of privatization of local public assets, as well as issues related to the re-scaling, recentralization or decentralization of competencies. Attention is paid to the rise of new 'austerity regimes', the question of their legitimacy and their spatial manifestations, and in particular to the social consequences of austerity. The contributions to this book lay the foundation for recommendations on how to improve and consolidate qualified governance arrangements in order to better address rapid economic and social changes. Such recommendations are applicable to cities and urban regions both within and outside of Europe. It identifies possible approaches, tools and partnerships to tackle the effects of the crisis and to prepare European cities for future challenges.
