International Handbook on Ecotourism Roy Ballantyne 2013-01-01 Roy and Jan have assembled a timely snapshot of our current understanding of ecotourism, both as a concept worthy of scientific inquiry and as an increasingly significant segment of global commerce and industry. A terrific piece of work! Sam Ham, University of Idaho, US In the 30 or so year since it became established in the tourism literature and in tourism practice, ecotourism has attracted as many proponents as opponents. This Handbook now brings together some of the leading scholars worldwide in this field, to explore the current position of this form of tourism. In doing so, it offers serious critiques, it explores meanings and paradoxes, it offers best practices and it looks to the future. It is the Handbook for one of tourisms fastest growing and controversial sectors. David Airey, University of Surrey, UK This is a most welcome and needed book. With a very strong editorial team and contributing authors, the Handbook covers all the key issues of ecotourism. It cuts through the confusion surrounding the much-misunderstood concept of ecotourism, clearly dealing with definitions, concepts and research issues. The Handbook is particularly welcome for its focus on the visitor experience, a strength of the editors, and for clearly linking the theory of ecotourism with practice in the field. Christopher Cooper, Oxford Brookes University, UK This Handbook brings together contributions from over forty international experts in the field of ecotourism. It provides a critical review and discussion of current issues and concepts it challenges readers to consider the boundaries of what ecotourism is, and could be. The Handbook provides practical information regarding the business of ecotourism; insights into ecotourist behaviour and visitor experiences; and reflections on the practice of ecotourism in a range of different contexts. The Handbook is designed to be a valuable reference book for tourism scholars and researchers.

Battles of the New Republic Prashant Jha 2014-01-12 Battles of the New Republic: A Contemporary History of Nepal is a story of Nepal's transformation from war to peace, monarchy to republic, a Hindu kingdom to a secular state, and a unitary to a potentially federal state. Part-reportage, part-history, part-analysis, part-memoir, and part-biography of the key characters, the book breaks new ground in political writing from the region. With access to the most powerful leaders in the country as well as diplomats, it gives an unprecedented glimpse into Kathmandu's high politics. But this is coupled with ground-level reportage on the lives of ordinary citizens of the hills and the plains, striving for a democratic, just and equitable society. It tracks the hard grind of political negotiations at the heart of the instability in Nepal. It traces the rise of a popular rebellion, its integration into the mainstream, and its steady decline. It investigates Nepal's status as a partly-sovereign country, and reveals India's overwhelming role. It examines the angst of having to prove one's loyalties to one's own country, and exposes the Hindu hill upper-caste dominated power structures. Battles of the New Republic is a story of the deepening of democracy, of the death of a dream, and of that fundamental political dilemma - who exercises power, to what end, and for whose benefit.

Locating the Field Simon Coleman 2020-09-09 Are reports of the death of conventional fieldwork in anthropology greatly exaggerated? This book takes a critical look at the latest developments and key issues in fieldwork. The nature of 'locality' itself is problematic for both research subjects and fieldworkers, on the grounds that it must now be maintained and represented in relation to widening (and fragmenting) social frames and networks. Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison. From the social space of a cybercafe to cities in India, the UK and South Africa among others, this book features a wide range of ethnographic studies that provide new ways of looking at the concepts of 'locality' and 'site'. It shows that rather than taking key fieldwork processes such as globalization and mobility for granted, anthropologists are well-placed to examine and critique the totalizing assumptions behind these notions.

Resistance and the State David Gellner 2007-04-15 There has been growing concern about "failed states" around the world, and since the massacre of the Royal family in Nepal in 2001 increasing media attention has focused on the decline of the state and the rise of the Maoist rebels in this Himalayan kingdom where so many Westerners have taken trekking vacations. Development was always going to be a problem in Nepal, but few predicted the precipitous collapse of the state in rural areas in the face of the Maoist insurgency beginning in 1996 due, to a large extent, to the failure of the state to deliver promised development and benefits; instead, it became more and more authoritarian, even oppressive. Exploring the complex relationship between a modernizing, developmentalist state and the people it professes to represent, these fascinating and readable accounts of ordinary people's lives depict the various contexts out of which the Maoist insurgency grew.

Solid Waste Management in Nepal Asian Development Bank 2013-08-01 Managing solid waste is one of the major challenges in urbanization. A survey conducted in all 58 municipalities of Nepal in 2012 found that the average municipal solid waste generation was 317 grams per capita per day. This translates into 1,435 tons per day or 524,000 tons per year of municipal solid waste generation in Nepal. Many of these technically and financially constrained municipalities are still practicing roadside waste pickup from open piles and open dumping, creating major health risks.

Gender Trouble Makers Jennifer Rothchild 2007-05-07 International development efforts aimed at improving girls' lives and education have been well-intended, somewhat effective, but ultimately short-sighted and incomplete. This is because international development efforts often operate under a reductive understanding of the term 'gender' and how it influences the lives of girls and boys. Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour. In particular, the analysis in *Gender Trouble Makers*

focuses on the social constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal. In developing countries like Nepal, promoting access to and participation in existing formal education programme is clearly necessary, but it is not, in itself, sufficient to transform gender power relations in the broader society. When gender is properly addressed as a process, then all stakeholders involved - researchers, governmental officials, and community members - can begin to understand and devise more effective ways to increase both girl and boy students' enrollment, participation, and success in school.
