Global Trends 2030 Office of the Director of National Intelligence Council 2017-03-11 This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible impact on future international relations. Regulating Big Tech Martin Moore 2021-09-13 Selected chapters from this book are published open access and free to read or download from Oxford Scholarship Online, <https://oxford.universitypressscholarship.com/>. Since Digital Dominance was published in 2018, a global consensus has emerged that technology platforms should be regulated. Governments from the United States to Australia have sought to reduce the power of these platforms and curtail the dominance of a few, yet regulatory responses remain fragmented, with some focused solely on competition while others seek to address issues around harm, privacy, and freedom of expression. Regulating Big Tech condenses the vibrant tech policy debate into a toolkit for the policy maker, legal expert, and academic seeking to address one of the key issues facing democracies today: platform dominance and its impact on society. Contributors explore elements of the toolkit through comprehensive coverage of existing and future policy on data, antitrust, competition, freedom of expression, jurisdiction, fake news, elections, liability, and accountability, while also identifying potential policy impacts on global communication, user rights, public welfare, and economic activity. With original chapters from leading academics and policy experts, Regulating Big Tech sets out a policy framework that can address interlocking challenges of contemporary tech regulation and offer actionable solutions for our technological future.

The Toughest Beat Joshua Page 2013-02-01 In America today, one in every hundred adults is behind bars. As our prison population has exploded, 'law and order' interest groups have also grown -- in numbers and political clout. In The Toughest Beat, Joshua Page argues in crisp, vivid prose that the Golden State's prison boom fueled the rise of one of the most politically potent and feared interest groups in the nation:

the California Correctional Peace Officers Association (CCPOA). As it made great strides for its members, the prison officers' union also fundamentally altered the composition and orientation of the penal field. The Toughest Beat is essential reading for anyone concerned with contemporary crime and punishment, interest group politics, and public sector labor unions.
