The Faculties of the Human Mind and the Case of Moral Feeling in Kant ' s Philosophy Antonino Falduto 2014-04-02 In the past few decades a remarkable change occurred in Kant scholarship: the "other" Kant has been discovered, i.e. the one of the doctrine of virtue and the anthropology. Through the rediscovery of Kant's investigations into the empirical and sensuous aspects of knowledge, our understanding of Kant's philosophy has been enriched by an important element that has allowed researchers to correct supposed deficiencies in Kant's work. In addition, further questions concerning the nature of Kant's philosophy itself have been formulated: the more the "other" Kant comes to the fore, the stronger the question concerning the connection between pure philosophy and empirical investigation becomes. The aim of this study is to show that the psychological and anthropological interpretations of Kant's pure philosophy are not convincing and at the same time to illustrate some connections between his critical and anthropological investigations by means of an analysis of the theory of the faculties. Against both a "transcendental psychological" and an "anthropological" reading, the book presents Kant's theory of the faculties as a constitutive part of his critical philosophy and shows that there is a close connection between Kant's pure philosophy and his moral aesthetic.

Law and Religion Wim Decock 2014-09-17 Wim Decock collects contributions by internationally renowned experts in law, history and religion on the impact of the Reformations on law, jurisprudence and moral theology. The overall impression conveyed by the essays is that on the level of substantive doctrine (the legal teachings) there seems to be more continuity between Protestant and Catholic, or, for that matter, between medieval and early modern jurisprudence and theology than usually expected. As it is illustrated with regards to topics ranging from just war doctrine over business ethics to marriage law, at the very least there appears to have been an on-going conversation between jurists and theologians across the confessional divide. This does not prevent some contributions from highlighting that on the institutional level, for instance in university politics, radical tensions between Reformers and Counter-Reformers played a paramount role. This book also offers approaches to the relationship between Church(es) and State(s) in the early modern period and to the practical as well as doctrinal use of natural law in both Protestant and Catholic lands.

Empiricist Theories of Space Laura Berchielli 2020-11-03 This book explores the notions of space and extension of major early modern empiricist philosophers, especially Locke, Berkeley, Hume, and Condillac. While space is a central and challenging issue for early modern empiricists, literature on this topic is sparse. This collection shows the diversity and problematic unity of empiricist views of space. Despite their common attention to the content of sensorial experience and to the analytical method, empiricist theories of space vary widely both in the way of approaching the issue and in the result of their investigation. However, by recasting the questions and examining the conceptual shifts, we see the emergence of a programmatic core, common to what the authors discuss. The introductory chapter describes this variety and its common core. The other contributions provide more specific perspectives on the issue of space within the philosophical literature. This book offers a unique overview of the early modern understanding of these issues, of interest to historians of early modern philosophy, historians and philosophers of science, historians of ideas, and all readers who want to expand their knowledge of the empiricist tradition.

Metaphysical Themes, Medieval and Modern (Volume 11) Alexander W. Hall 2014-03-25 Metaphysical Themes, Medieval and Modern presents three sets of essays that engage the metaphysics of substance through a study of thought on this theme over the last eight centuries, shedding light on contemporary disputes as well as the history of thought leading into the modern era. Part I grows out of an author-meets-critics panel on Robert Pasnau's *Metaphysical Themes: 1274 – 1671* (OUP, 2011). Pasnau's rich study delves into the four centuries wherein later medieval thought gives way to the modern period. Andrew Arlig reflects on Pasnau's discussion of holonyms, entities such as God and the human soul, that are thought to exist as wholes in more or less disparate things. Paul Symington, on the other hand, treats the substance ontology of Thomas Aquinas in particular through a reflection on Aquinas's understanding of the ontological status of the various modes or accidents of Aristotelian substances. Part II, "Substance Ontology, Medieval and Modern", transitions to contemporary substance ontology. Travis Dumsday canvasses the field of debate over what is the substratum of change, contending that the Aristotelian, hylomorphic account of substance that views substances as matter-form composites remains the most robust. Gyula Klima, while agreeing with Dumsday's conclusion, strengthens his argument with reference to the development of this bundle of problems within the recent history of analytic philosophy. Dumsday concludes with reflections on the relevance of substance ontology to natural theology, which, in turn, is the theme of Part III, "The Natural Theology of Thomas Aquinas", wherein Alexander Hall and Michael Sirilla consider how Aquinas's understanding of the divine substance bears on the logic of demonstration in his natural theology, concluding that contemporary Radical Orthodoxy readings that have Aquinas forfeit demonstrative proof that God exists misconstrue him on this point.

Gary Soto Ron McFarland 2022-08-05 In a 1995 interview, prolific Chicano writer Gary Soto noted, "Wonderment has always been a part of my life." This book surveys Soto's immense range of poems, stories, novels, essays and plays for audiences of prereaders to adults. Soto's world moves from the cotton and beet fields of the San Joaquin Valley to the blue-collar barrios of Fresno, and to urban and suburban settings in Oakland and Berkeley. Chapters analyze a wide variety of Soto titles, from his breakout works like 1977's *The Elements of San Joaquin* to the *Chato the Cat* illustrated books for children. With self-deprecating humor, particularly in his poems, Soto combines his wonderment with the trials and conflicts that beset him throughout life. In such novels as *Jesse*, *Buried Onions* and *The Afterlife*, and in his stories for YA readers, including *Baseball in April* and *Petty Crimes*, his broad array of characters confront the anxieties and annoyances of adolescence. Although he continues to motivate young Chicanos to read and write, Soto stakes his greatest claims to literary prominence through his poems, which are accessible to readers of all ages.

The Scope of Understanding in Sociology (RLE Social Theory) Werner Pelz 2014-08-13 In their efforts to emulate the methodology which had proved so successful in the natural sciences, the social sciences – including sociology – have not yet faced the question as to what constitutes understanding in their area with sufficient seriousness. This book asks again: what does understanding denote in an area where man tries to understand man, where self-understanding is involved, where new understanding immediately becomes part of that which is to be understood? What can we know and what is the use and limitation of knowledge in sociology? When are we conscious that we know and understand? Werner Pelz argues for a thorough reorientation in our approach to sociological thinking, and suggests that scientific preconceptions have often precluded possibly fruitful approaches to humane understanding. He investigates the relations between

various kinds of knowing, and examines the new possibilities of understanding made available, for example, by psychoanalytical and phenomenological insights, as well as by those of poets, artists, mystics. He shows that in the social and humanistic sciences, creative or constitutive contributions illuminate rather than demonstrate, and that, for this reason, sociology has not yet found an appropriate method for conveying them without serious distortions.

Renaissance in Italy : Italian Literature, Volume IV (Illustrated) John Addington Symonds 2014-04-03 " Thus what the word Renaissance really means is new birth to liberty—the spirit of mankind recovering consciousness and the power of self-determination, recognizing the beauty of the outer world, and of the body through art, liberating the reason in science and the conscience in religion, restoring culture to the intelligence, and establishing the principle of political freedom. The Church was the schoolmaster of the Middle Ages. Culture was the humanizing and refining influence of the Renaissance. "

Political Economy and Religion Gilbert Faccarello 2020-04-30 Ever since Antiquity, reflections about economic problems have always been intertwined with questions relating to politics, ethics and religion. From the 18th century onwards, economic thought seemed to have been gradually disentangled from any other field, and to have gained the status of an autonomous scientific discipline, especially with the later use of mathematics. In fact, the growth of economic knowledge never broke off any ties with these other fields, and, especially with religion and ethics, even though the links with them became less obvious, they only changed shape. This is what this book illustrates, each chapter dealing with different periods and authors from the Middle Ages to the present times. Focusing in turn on the thought of the Scholastics, Ibn Rushd (Averroes), John Calvin, the French liberal Jansenists, Dugald Stewart, David Ricardo, Henri de Saint-Simon, Charles de Coux and French Christian Political Economy, Auguste Comte and Émile Durkheim, Henry Sidgwick, Arthur Cecil Pigou, and finally John Maynard Keynes, the studies collected here show how religious themes played an important role in the development of economic thought. This book was originally published as a Special Issue of The European Journal of the History of Economic Thought.

The Reconceptualization of European Union Citizenship Elspeth Guild 2013-01-09 This book maps out, from a variety of theoretical standpoints, the challenges generated by European integration and EU citizenship for community membership, belonging and polity-making beyond the state. It does so by focusing on three main issues of relevance for how EU citizenship has developed and its capacity to challenge state sovereignty and authority as the main loci of creating and delivering rights and protection. First, it looks at the relationship between citizenship of the Union and European identity and assesses how immigration and access to nationality in the Member States impact on the development of a common European identity. Secondly, it discusses how the idea of solidarity interacts with the boundaries of EU citizenship as constructed by the entitlement and capacity of mobile citizens to enjoy equality and social rights as EU citizens. Thirdly, the book engages with issues of EU citizenship and equality as the building blocks of the EU project. By engaging with these themes, this volume provides a topical and comprehensive account of the present and future development of Union citizenship and studies the collisions between the realisation of its constructive potential and Member State autonomy.
