*Engaging with Empowerment Srilatha Batliwala 2015-09-02 In this fascinating collection of writings, Srilatha Batliwala, feminist thinker and practitioner, explores the many dimensions of what empowerment means for, and to, women. Looking back on a life lived through commitment to a cause—rather than to an organisation or to a sector—and working for it at many levels and locations, she traces the evolution of the concept from the late 1980s till now, unravelling its ambiguities, highlighting insights gained through practice, and analysing how and why it has been depoliticised and reduced by the state and aid agencies. Along the way, Batliwala traverses key sectors, including education for women, politics outside political systems, grassroots movements, energy for sustainable development, and a controversial questioning of a rights-based approach to women's equality.*

*Curriculum Leadership by Middle Leaders Kelvin Heng Kiat Tan 2016-08-12 Curriculum Leadership by Middle Leaders focusses on major issues relating to the continuing national and international discourse on curriculum leadership, and highlights the vital role of middle leaders in schools. School leadership has focused primarily on first-order change involving school leaders or principals. This book seeks to put the spotlight on second-order change that involves curriculum leadership and professional development support on the part of middle leaders for more sustainable and long-term change in teaching and learning that will influence what happens in classrooms. With timely and thought-provoking contribution from authors who pursue a range of scholarly interests in multiple educational settings, the book is guided by several underlying questions: How might we re-envision curriculum leadership so that it addresses both local and global concerns and aspirations? How might we better grasp how middle leaders understand and respond to the pressures of educational reform initiatives? How might middle leaders transform pressures into possibilities? This book will appeal to current teachers, those currently undertaking teacher training and students*

or academics carrying out research in the field of educational leadership.

*Responsible Leadership* Nicola M. Pless 2012-11-27 These chapters on 'Responsible Leadership' represent the latest thinking on a topic of increasing relevance in a connected world. There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice. Whilst offering conceptualisations for the improvement of leadership is a first and perhaps easier response, what is more difficult is to facilitate the actual change to happen. These chapters will not only generate interest in the emerging domain of studies on responsible leadership, but also will pave the way for future research in this area in the years to come. *Leadership At Scale* Claudio Feser 2018-12-04 Traditional approaches to leadership development focus on a small number of individuals at the top. However, in today's world of constant change and decentralized decision-making, organizations need effective leaders at all levels of their organizations. That requires a much broader and deeper pool of leadership talent, and most organizations fall far short of what they need. *Leadership at Scale* defines a new approach. In it, top experts at McKinsey, the world's number one leadership factory, expose the secrets of how to drive leadership development that reaches the entire organization, adapts to diverse contexts and achieves impact at scale. Grounded in extensive research and the global experience of +25 leadership experts and illustrated with a fictional step-by-step case with numerous real-life examples, this book provides leaders with the systematic and fact-based approach they need to unlock organizational performance through leadership effectiveness.

The Power of Invisible Leadership Gill Robinson Hickman 2013-02-27 A powerful force draws people to leadership in countless businesses, nonprofits, government agencies, and social movements—we call it invisible leadership. Invisible leadership embodies situations in which dedication to a compelling and deeply held common purpose is the motivating force for leadership. The Power of Invisible Leadership: How a Compelling Common Purpose Inspires Exceptional Leadership, by Gill Robinson Hickman and Georgia L. Sorenson, is a readable, research-based book that shows readers how invisible leadership exists in the space between leaders and followers, artists and subjects, and purposes and people. Rather than reinforcing the idea that leadership is embodied in celebrity leaders or in gifted and charismatic individuals, this insightful new book identifies "charisma of purpose" as the motivating force for invisible leadership.

Powered by a decade of global research and practice by the top-ranked Center for Creative Leadership (CCL), this book takes you from rural towns in the United States to Hong Kong's skyline and from a modernizing South Africa to the bustling streets of India, showing you how to build bridges across boundaries. Through compelling stories and practical tools and tactics, you'll learn how to apply the six boundary spanning practices that occur at the nexus where groups collide, intersect, and link: Buffering defines boundaries to create safety Reflecting creates understanding of boundaries to foster respect Connecting suspends boundaries to build trust Mobilizing reframes boundaries to develop community Weaving interlaces boundaries to advance interdependence Transforming cross-cuts boundaries to enable reinvention Together, these practices combine to create what authors Chris Ernst and Donna Chrobot-Mason call the Nexus Effect. The Nexus Effect allows groups to be more agile in response to changing markets; be more flexible in devising and deploying cross-functional learning and problem-solving capabilities; work with partners in deeper, more open relationships; empower virtual teams; and create a welcoming, diverse, and inclusive organization that brings out everybody's best. Action Leadership Ortrun Zuber-Skerritt 2011-04-15 Action leadership is a creative, innovative, collaborative and self-developed way to lead. It eschews the hierarchical structure usually associated with leadership and is based instead on the democratic values of freedom, equality, inclusion and self-realization. It take responsibility for, not control over, people through networking and orchestrating human energy towards a holistic outcome that benefits the common interest. Action leaders are passionate people who abide by the motto that "Learning does not mean to fill a barrel but rather to ignite a flame" in others. And in this time of rapid economic, political, technological, social and ecological changes, action leadership and action leaders are precisely what's needed to improve how people and organizations engage constructively to address the myriad complex issues challenging society at all levels. *Action Leadership: Towards a Participatory Paradigm* explains and illustrates how action leadership can be developed through participatory action learning and action research (PALAR). It addresses real-life issues by people who choose to work collaboratively towards shared goals while developing their learning, insights, knowledge, people skills and personal relationships through involvement in a PALAR project. Research in Education 1974

Leadership for the Twenty-first Century Joseph Clarence Rost 1991 This illuminating study critiques the concept of leadership as understood in the last 75 years and looks to the twenty-first century for a reconstructed understanding of leadership in the postindustrial era. More similarities in past decades were found than had been thought; the thread throughout Rost's book is that leadership was conceived of as good management. He develops a new definition and paradigm for leadership in this volume that distinguishes leadership from management in fundamental ways. The ethics of leadership from a postindustrial perspective completes the paradigm. The book concludes with suggestions that can be immediately utilized in helping to transform our understanding of leadership.

A Decade of Research on School Principals Helene Ärlestig 2015-11-13 This book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries. Each of these directions has its own particular cultural, educational and policy history.

Taken together, the various chapters in the volume provide a rich and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals, and their contributions to the improvement of teaching and the learning and achievement of students. The particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country. This collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of school principals is second only to that of teachers in their capacity to impact students' progress and achievement and to promote equity and social justice.

*The Psychology of Leadership* David M. Messick 2004-09-22 In this book, some of the world's leading scholars come together to describe their thinking and research on the topic of the psychology of leadership. Most of the chapters were originally presented as papers at a research conference held in 2001 at the Kellogg School of Management of Northwestern University. The contributions span traditional social psychological areas, as well as organizational theory; examining leadership as a psychological process and as afforded by organizational constraints and opportunities. The editors' goal was not to focus the chapters on a single approach to the study and conceptualization of leadership but rather to display the diversity of issues that surround the topic. Leadership scholars have identified a host of approaches to the study of leadership. What are the personal characteristics of leaders? What is the nature of the relation between leaders and followers? Why do we perceive some people to be better leaders than others? What are the circumstances that evoke leadership qualities in people? Can leadership be taught? And so on. The contributions to this book examine these important questions and fall into three categories: conceptions of leadership, factors that influence the effectiveness of leadership, and the consequences and effects of leadership on the leader. All in all, the chapters of this volume display part of a broad spectrum of novel and important approaches to the study of the psychology of leadership. We hope that they are equally useful to those who are or would be leaders and to those who study the topic. As recent events have served to remind us, it is too important a topic to be ignored by psychologists.

*Critical Perspectives on Leadership* Mark Learmonth 2019-05-21 Within contemporary culture, 'leadership' is seen in ways that appeal to celebrated societal values and norms. As a result, it is becoming difficult to use the language of leadership without at the same time assuming its essentially positive, intrinsically affirmative nature. Within organizations, routinely referring to bosses as 'leaders' has, therefore, become both a symptom and a cause of a deep, largely unexamined new conceptual architecture. This architecture underpins how we think about authority and power at work. Capitalism, and its turbo-charged offspring neo-liberalism, have effectively captured 'leader' and 'leadership' to serve their own purposes. In other words, organizational leadership today is so often a particular kind of insidious conservatism dressed up in radical adjectives. This book makes visible the work that the language of leadership does in perpetuating fictions that are useful for bosses of work organizations. We do this so that we - and anyone who shares similar discomforts - can make a start in

unravelling the fiction. We contend that even if our views are contrary to the vast and powerful leadership industry, our basic arguments rest on things that are plain and evident for all to see. *Critical Perspectives on Leadership: The Language of Corporate Power* will be key reading for students, academics and practitioners in the disciplines of Leadership, Organizational Studies, Critical Management Studies, Sociology and the related disciplines.

Connolly, Thomas M. 2021-12-03 The global higher education sector has changed dramatically as universities continue to face unprecedented challenges associated with the COVID-19 pandemic. *Finding Your Leadership Focus* Douglas B. Reeves 2011 In his new book, author and international keynoter Douglas Reeves addresses a major challenge faced by today's school leaders: an ever-growing load of programs and initiatives. Reeves contends that program overload not only taxes leadership resources, but actually hurts rather than improves student performance. Drawing on recent research findings, this book shows how leaders can pare down from a proliferation of initiatives to determine what is truly most important based on their local concerns, challenges, populations, and other school factors. Identifying a specific set of leadership practices that are more strongly associated with improvements in student achievement, Reeves provides explicit guidelines for how school leaders can improve their most critical leadership decisions by simultaneously engaging in three essential strategies: monitoring teaching and leadership practices, building high degrees of efficacy among staff members, and focusing on a smaller number of

priorities. *Finding Your Leadership Focus* is essential reading for new and veteran principals, teacher leaders, and PLC book study groups.
