 Global Weirdness Climate Central 2012-07-24 Produced by Climate Central—a highly regarded independent, nonprofit journalism and research foundation founded in 2008—and reviewed by scientists at major educational and research institutions the world over, Global Weirdness summarizes, in clear and accessible prose, everything we know about the science of climate change; explains what is likely to happen to the climate in the future; and lays out in practical terms what we can and cannot do to avoid further shifts. Sixty easy-to-read entries tackle such questions as: Is climate ever "normal"? Why and how do fossil-fuel burning and other human practices produce greenhouse gases? What natural forces have caused climate change in the past? What risks does climate change pose for human health? What accounts for the diminishment of mountain glaciers and small ice caps around the world since 1850? What are the economic costs and benefits of reducing carbon emissions? Global Weirdness enlarges our understanding of how climate change affects our daily lives, and arms us with the incontrovertible facts we need to make informed decisions about the future of the planet and of humankind. With black-and-white images interspersed throughout.

 Differential Forms and Applications Manfredo P. Do Carmo 2012-12-06 An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

 Barbary Vonda N. McIntyre 2021-10-12 A story of feline first contact by the Hugo and Nebula Award–winning author that "recalls Robert Heinlein's excellent stories for this age group" (Publishers Weekly). Twelve-year-old Barbary has been dreaming of going to space for as long as she can remember. Now, the orphan is on her way, joining the family of her mother's best friend on the research station Einstein—but she won't be going alone. Barbary can't bear to leave behind her only friend, a Manx tabby cat named Mickey. Getting used to zero gravity is just one challenge the pair will face on their journey; when they finally land on Einstein, Barbary will have to trust her new sister with her secret stowaway. But Mickey's mischievous nature may get Barbary kicked off of her new home for good—and put all of humanity at risk as an alien ship flies their way . . . "Excitement about space, living on a frontier, and . . . down-to-earth mechanical details . . . McIntyre displays the talent that won her acclaim." —Publishers Weekly "Engrossing. A lot of physics and engineering are woven unobtrusively into the book. Good for buffs and newcomers." —Kirkus Reviews

 The Hardmen The Velominati 2017-06-01 It's time we all stopped whining and learned a thing or two from The Toughest Cyclists Ever. Including: Stephen Roche, whose cure for exhaustion was to go up a gear and fight harder, all the way to the ambulance. Eddy Merckx, who hurt himself so badly in breaking the Hour record that, he estimated, he shortened his career by a year. Beryl Burton, who crushed her (male) rival's morale with the offer of a piece of liquorice, before speeding past to victory. Nicole Cooke and Edwig Van Hooydonck, who rejected dope and became legends. The Hardmen tells the stories - the good bits, anyway - of the 40 most heroic Cyclists ever. Their bravery, their panache and their Perfect Amount of Dumb. It reminds us that suffering on a bike liberates us from our daily lives, and that, in the words of Lance Armstrong "pain is temporary, quitting lasts forever"; proof that even assholes can be humbled.

 Savage Tales Linda Goddard 2019-09-03 "An original study of Gauguin's writings, unfolding their central role in his artistic practice and negotiation of colonial identity. As a French artist who lived in Polynesia, Paul Gauguin (1848-1903) occupies a crucial position in histories of European primitivism. This is the first book devoted to his wide-ranging literary output, which included journalism, travel writing, art criticism, and essays on aesthetics, religion, and politics. It analyzes his original manuscripts, some of which are richly illustrated, reinstating them as an integral component of his art. The seemingly haphazard, collage-like structure of Gauguin's manuscripts enabled him to evoke the "primitive" culture that he celebrated, while rejecting the style of establishment critics. Gauguin's writing was also a strategy for articulating a position on the margins of both the colonial and the indigenous communities in Polynesia; he sought to protect Polynesian society from "civilization" but remained implicated in the imperialist culture that he denounced. This critical analysis of his writings significantly enriches our understanding of the complexities of artistic encounters in the French colonial context."--Publisher's description.

Tiger Country Nina Raine 2014-12-11 Nina Raine's Tiger Country is a hospital play that follows a tangle of doctors and nurses in a busy London hospital - from the award-winning author of Tribes. Professionalism and prejudice, turbulent staff romances, ambition and failure collide in this swirling, action-packed drama about an overburdened health service that we all depend on and the dedicated individuals that keep it going. 'Tiger country' is where animal instinct stirs and an irrefutable eye opens. Where we make eye contact with the unknown. Tiger Country was premiered at Hampstead Theatre in 2011 and, following its sell-out run, was revived there in 2014.

Psychology of the Media David Giles 2010-08-20 From newspapers to social networking sites, the mass media play a huge role in shaping the way we see ourselves and others. In this engaging introduction, Giles explores our relationship with the media, looking at the effects of advertising, celebrity worship and media influence on violent behaviour. Whatever your level of study, this introduction will help you to evaluate the full reach of the media in our lives.

Precalculus with Limits: A Graphing Approach, Texas Edition Ron Larson 2014-02-12 Part of the market-leading graphing approach series by Ron Larson, PRECALCULUS WITH LIMITS: A GRAPHING APPROACH is an ideal student and instructor resource for courses that require the use of a graphing calculator. The quality and quantity of the exercises, combined with interesting applications and innovative resources, make teaching easier and help students succeed. Retaining the series' emphasis on student support, selected examples throughout the text include notations directing students to previous sections to review concepts and skills needed to master the material at hand. The book also achieves accessibility through careful writing and design-including examples with detailed solutions that begin and end on the same page, which maximizes readability. Similarly, side-by-side solutions show algebraic, graphical, and numerical representations of the mathematics and support a variety of learning styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Speeches of Note Shaun Usher 2018-12-04 From the author of the New York Times bestseller Letters of Note comes a collection of 75 of history's most interesting, profound, and sometimes unknown speeches from a range of scintillating personalities such as Frederick Douglass, Justin Trudeau, Albert Einstein, Meghan Markle, Barbara Jordan, and Ursula K. Le Guin. This thoughtfully curated and richly illustrated collection celebrates oratory old and new, highlighting speeches we know and admire, while also shining a light on profound drafts that were never delivered or have until now been forgotten. From George Bernard Shaw's warm and rousing toast to Albert Einstein in 1930 and the commencement address affectionately given to graduates at Long Island University by Kermit the Frog, to the chilling public announcement (that was thankfully never made) by President Richard Nixon should Neil Armstrong and Buzz Aldrin become stranded on the moon, Speeches of Note honors the words and ideas of some of history's most provocative and inspiring personages.

BSCS Science 2008 A three-year program in the sciences for high school. Teacher (wraparound) ed. provides teachers with background information, strategies for guiding students through each activity using an inquiry-based approach, answers to the questions posed, and outcomes and indicators of success for each activity; has reduced student pages so teachers are on the same page as the students and still have access to the strategies and answers.

Visual Basic 2008 Paul J. Deitel 2009 Appropriate for all basic-to-intermediate level courses in Visual Basic 2008 programming. Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. Students begin by getting comfortable with the free Visual Basic Express 2008 IDE and basic VB syntax included on the CD. Next, they build their skills one step at a time, mastering control structures, classes, objects, methods, variables, arrays, and the core techniques of object-oriented programming. With this strong foundation in place, the Deitels introduce more sophisticated techniques, including inheritance, polymorphism, exception handling, strings, GUI's, data structures, generics, and collections. Throughout, the authors show developers how to make the most of Microsoft's Visual Studio tools. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

Incredible Answers to Prayer Roger J. Morneau 1990 It was five degrees below zero, and Roger Morneau was out of gas. If his toes froze, they would have to be amputated. The man bowed his head in prayer. "It was almost as if something hit the back of my automobile and it shot forward," he says. "Then the motor started to accelerate and hummed like never before." He drove the 27 miles to safety without a drop of gas!

308 Circuits Jan Buiting 2003 This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.
