*War and Peace Pierre-Joseph Proudhon 2022-08-23 War and Peace by Pierre-Joseph Proudhon, originally published in 1861, is still one of the only extended accounts of anarchist international theory and is one of the earliest in the history of socialist thought. It is a profound contribution to the traditions of jus gentium and just war theory, that puts force and power at the centre of analysis. Alex Prichard's introduction describes both its specificity and the multiple lines of influence War and Peace had on thinkers as diverse as Tolstoy, Sorel, French sociology more broadly, and post-1945 Anglo-American International Relations theory.*

**Design Meets Disability** Graham Pullin 2011-09-30 *How design for disabled people and mainstream design could inspire, provoke, and radically change each other. Eyeglasses have been transformed from medical necessity to fashion accessory. This revolution has come about through embracing the design culture of the fashion industry. Why shouldn't design sensibilities also be applied to hearing aids, prosthetic limbs, and communication aids? In return, disability can provoke radical new directions in mainstream design. Charles and Ray Eames's iconic furniture was inspired by a molded plywood leg splint that they designed for injured and disabled servicemen. Designers today could be similarly inspired by disability. In Design Meets Disability, Graham Pullin shows us how design and disability can inspire each other. In the Eameses' work there was a healthy tension between cut-to-the-chase problem solving and more playful explorations. Pullin offers examples of how design can meet disability today. Why, he asks, shouldn't hearing aids be as fashionable as eyewear? What new forms of braille signage might proliferate if designers kept both sighted and visually impaired people in mind? Can simple designs avoid the need for complicated accessibility features? Can such emerging design methods as "experience prototyping" and "critical design" complement clinical trials? Pullin also presents a series of interviews with leading designers about specific disability design projects, including stepstools for people with restricted growth, prosthetic legs*

*(and whether they can be both honest and beautifully designed), and text-to-speech technology with tone of voice. When design meets disability, the diversity of complementary, even contradictory, approaches can enrich each field.*

*The Laboratory of Progress Joseph Jung 2022-09-16 The Laboratory of Progress: Switzerland in the 19th Century tells the improbable story of how a small, backward, mountainous agricultural country with almost no raw materials became an industrial powerhouse, a hub of innovation, a touristic mecca and a pioneer in transportation – all in the course of a single century. That a tiny landlocked country should become a dominant steamship builder for the rest of the world; that a country that had never seen a cotton plant should become the world’s second-largest textile producer; that a country with hardly any level terrain should come to boast the world’s most highly developed railway network; and that a country whose main export was impoverished emigrants should be transformed into one of the world’s major financial centres – these astonishing developments, among many others, are explored and explained, both through the specific stories of individual innovators and through a prescient analysis of the political, economic, societal and cultural structures that formed the context in which Switzerland’s astonishing transformation took place. The book is a compelling read both for professional historians and for general readers with an interest in Switzerland; it highlights the roles of transport networks and individual pioneers in industrial and political development.*

*Archives, Documentation, and Institutions of Social Memory Francis Xavier Blouin 2007-08-02 As sites of documentary preservation rooted in various national and social contexts, artifacts of culture, and places of uncovering, archives provide tangible evidence of memory for individuals, communities, and states, as well as defining memory institutionally within prevailing political systems and cultural norms. By assigning the prerogatives of record keeper to the archivist, whose acquisition policies, finding aids, and various institutionalized predilections mediate between scholarship and information, archives produce knowledge, legitimize political systems, and construct identities. Far from being mere repositories of data,*

*archives actually embody the fragments of culture that endure as signifiers of who we are, and why. The essays in Archives, Documentation, and Institutions of Social Memory conceive of archives not simply as historical repositories but as a complex of structures, processes, and epistemologies situated at a critical point of the intersection between scholarship, cultural practices, politics, and technologies.*
